

CABINET MODIFICATIONS

POTTER-ROEMER

A Division of Smith Industries, Inc.

DANA

The DANA door option provides a range of design choices for the specifier. A life safety station can be unmistakably conspicuous or blend, with subtle awareness, into the surrounding environment. It is available in all door materials listed in Step 3 on page 9.

FUNCTION: Integrates a concealed hinge and handle with the strength of unitized door construction.

SPECIFY: Use prefix **DANA**

DANA

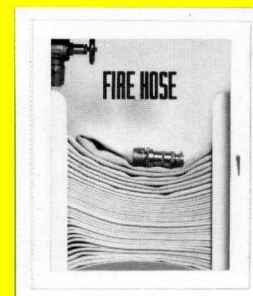

HORIZONTAL FOLD HOSE CABINET

FUNCTION: Used to provide non-automatic horizontal fold storage for 1½"/3.8 cm or 2½"/6.4 cm lined hose without using a hose rack or reel.

Add **SUFFIX-HF** to cabinet model number.

SUFFIX-HF modification provides a basic cabinet with:

- Curved Hose Bed
- Hose Retaining Panels

SUFFIX-HF

DUPLEX CABINET

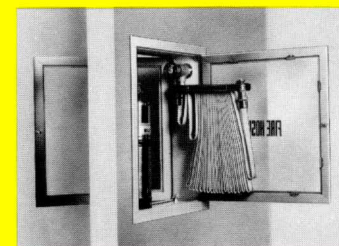

FUNCTION: Used to provide common access to cabinet contents from both sides of a wall or partition.

SUFFIX-DP modification provides a basic cabinet with:

- Box with flange on front and open back with no flange, corner brackets on both front and back
- Two doors and frames

ORDERING INFORMATION

- Select cabinet door style (Refer to page 10)
- Specify valve inlet location
- Specify finished wall depth
- Specify valve
